DETAILED ACTION

Reasons of Allowance

1. The following is an examiner's statement of reasons for allowance: claims 1 – 4 are allowable over the prior art of record for the reasons as stated in the Applicant's amendment filed on January 05, 2007 pages 2 – 7 and Examiner's Office Action mailed out October 05, 2006 pages 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. In this case, the prior art teaches a push-to-talk mobile station has processors where one of the processors is radio control unit that provides control to both an adaptive communication processor, and one of the processors is the adaptive communication processor (microprocessor) that receives a push-to-talk key input via conductor into from the operator.

None of the prior art of record teaches or fairly suggests that a push-to-talk (PTT) wireless device for synchronizing the microprocessor and the radio chip comprises checking a status that if the user push-to-talk button is on and the radio PTT is off, sending a command to the radio chip to turn on the radio PTT key, and waiting for

response from the radio chip, and if the response indicates the radio PTT key is on, remaining in this synchronized state, and if the user button is off and the radio PTT key is on, sending a command to the radio chip to turn off the radio PTT key, and waiting for response from the radio chip, and if the response indicates the radio PTT key is off remaining in this synchronized state, and also if the user PTT button is on (or off) the radio PTT key is on (or off), remaining in this synchronized state, and together with combination of other element as set forth in the claims.
